Parts List

Panzer Tractor Models T75 and T758ES

When ordering Panzer parts always give the model number of the Tractor, the figure and part number, and the name of the part.

In all cases where standard hardware, belts or similar parts can be used their sizes are indicated. The entire Panzer rear axle assembly is a rebuilt Plymouth rear end. Where regular automobile repair parts can be used this is indicated by (*). Rears from a wide range of years prior to 1957 are used but only in case of oil seal size and number of axle spline

teeth is there significant difference. No axle outer seals are reinstalled in Panzer Tractor rear ends.

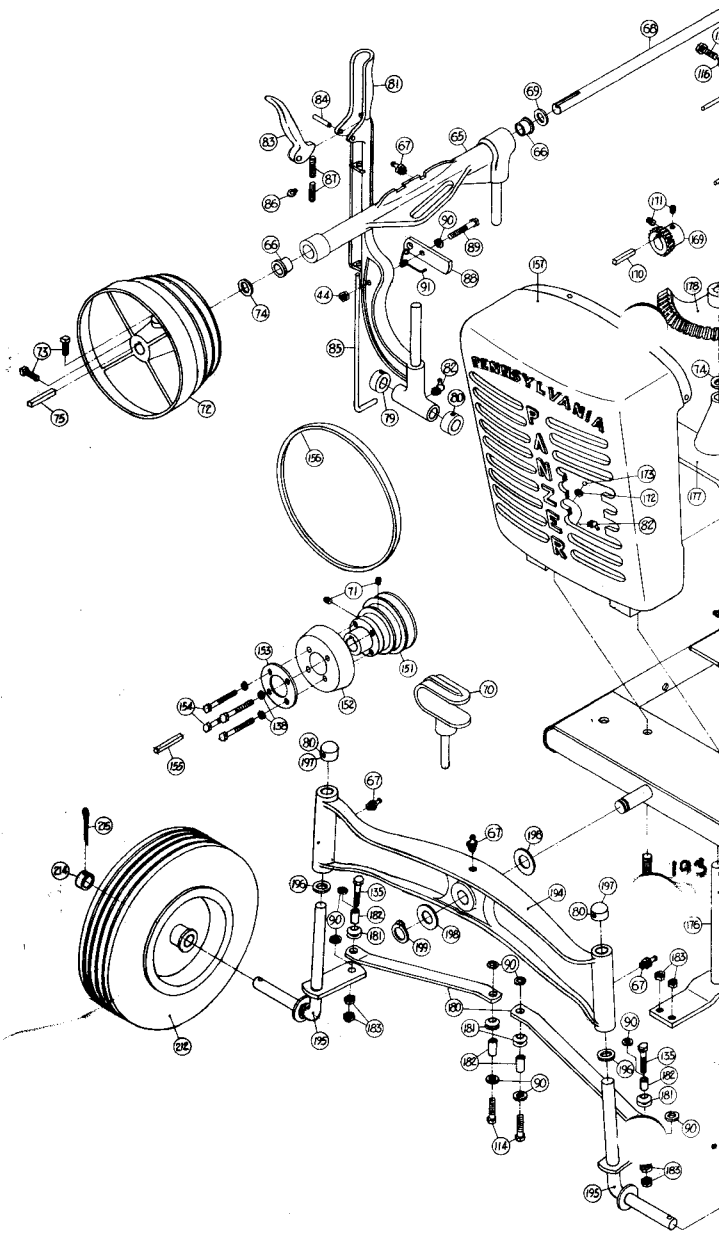

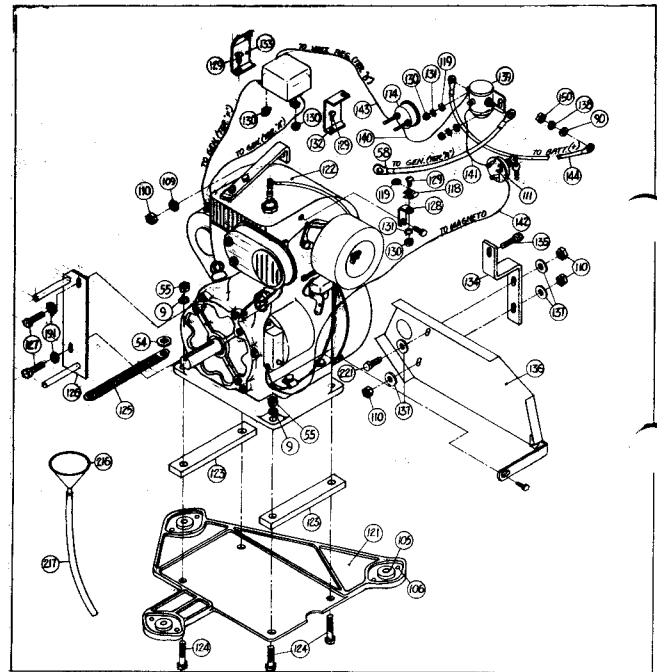

Engines are covered by separate Engine Mfg. warranty and parts lists. Parts for them are not handled by Panzer, but must be obtained from Engine Dealers.

Panzer reserves the right to change parts, design, materials and specifications without notice.
